

Product Specification Sheet:

Motion E

Tilt in Space Reclining Bath

able
Healthcare

Highlights:

- Free standing with height and reclining adjustment - simple electronic operation
- Extra large door opening and lip-free low entry height of 49cm: easy self entry
- Large footwell (98 ltr) with auto pre-fill
- Fastest drain and speedy fill time
- Interior moulded seat for extra comfort and support

The Motion E reclining bath is a cost effective model in our iconic Motion range yet still offering the very latest style combined with a revolutionary approach to bathing. Our specialist design team has worked very closely with professionals in the care sector to combine a contemporary appearance with practical performance.

Despite its advanced mechanism it takes just one carer to operate the Motion E, easily adjusting the height and tilt of the bath to allow easy access for the bather. The side door gives a large lip-free aperture making access easier for wheelchair users, self-bathers or to be used in combination with a hoist. Space under the bath also allows hoists or wheelchairs to be positioned very close to the bath for a smoother transfer.

The large footwell (98 litres) can be filled prior to entry to allow a bather to have enough water to be immersed as soon as the bath is tilted back. This bath also boasts the quickest drain time (75 litres a minute) and a very speedy fill time (66 litres per minute), ensuring that the bather is immersed quickly as the bath fills and is not left in draining lukewarm water as the bath empties.

Standard Features:

- Maximum Working Load (MWL) 210 kg / 33 st
- Height range 810 mm - 1010 mm (200 mm)
- External dimensions 1908 mm (L) x 935 mm (W)
